Cambridge 9th Jan 7, 1857
Dear Mr Brace

The *Physala* of
Galapagos is the
P. ovata, J.D. Hook. Fl.
Malap. in Linn. Trans. —

But a form with more spat-
ulate & retuse leaves. — If
you do not want it returned
I should like to send a part
of it to Dr. Hooker, on account of
its peculiarities.

Yours very faithfully

A. Gray

I am in a good deal
hard up with bad face.
A.G.
